make a release

doi minting

Long-term archive (e.g. Zenodo)

User (using R)

(using R)

```
> library(taxonlookup)
> plant_lookup_version_current_github()

[1] "1.1.5"

> data <- lookup_table("1.1.5")
```

Datastorr package

- fetches releases via API as needed
- caches release on local machine
- creates custom data packages
